

BallistiMAX

impenetrable **Bullet** Resistance

"We used the 7.62 x 39, the AK-47 round, along with the 5.7 pistol round and nothing went through. This thing took a beating today, and it's a very ingenious product."

Bob Behan
Coral Springs, FL Police Dept.

Specifications

- Lightweight transparent armor retrofitted to your existing glass windows
- Defeats threat of rapid gunfire from both handguns and semi-automatic weapons, including the AR-15 and AK-47
- Features BallistiSHOCK and COUNTERFIRE
- Weighs only 11 lbs. per square foot
- Robotic precision installation is available
- Proudly manufactured in the USA!

BallistiMAX

High Performing Bullet Resistance with BallistiSHOCK Countermeasure

- BallistiMAX will resist gunfire from even the most ominous weapons.
- BallistiMAX includes a proprietary countermeasure technology called BallistiSHOCK which disables the shooter by utilizing the outermost layer of glass as a 'spray' towards the shooter, while continuing to maintain full protection for anyone inside of the building.
- BallistiMAX fits right over your existing window or glass door enclosure with no construction mess!
- BallistiMAX is placed to precision with a robotic lift, ensuring a non-invasive, clean and fast installation.
- BallistiMAX has been installed in and currently protects schools, houses of worship, historical monument visitors sites, government buildings and more!
